**Subject:** RE: MICROSOFT SUIT

I personally think it's time to drop this crap with Microsoft and let them get on with running the company and developing products. If it wasn't for Microsoft the normal public would still be in the 1800 century and know nothing about computers, how they work, or ever be able to own one.

Please drop this crap and use the money to try these people who waged a war on the US rather than on stupid law suits against Microsoft.

Thank you....
